

MEGA-FOS ORGANIC

A Biological Boost
for Plant Health.

IMPROVED PLANT
HEALTH

INCREASED
YIELDS

ENHANCED SOIL
FERTILITY

Mega-Fos Organic is a biological foliar plant and soil feed designed to improve plant health, increase yields, and enhance soil fertility. It contains a consortium of beneficial microorganisms called Megabacters and humic and fulvic acids, seaweed extract, and essential minerals.

SFS
BIOLOGICAL SOIL
& PLANT HEALTH

Key benefits of Mega-Fos Organic:

- **Improved plant health:** Stimulates rooting, encourages fine root hairs, and reduces disease pressure.
- **Increased yields:** Boosts soil nutrient cycling and increases yields.
- **Enhanced soil fertility:** Improves phosphate availability and stimulates root growth.

Key Features:

- **Contains over 60 mineral elements:** Provides essential nutrients for plant growth.
- **Improves phosphate availability:** Helps plants access essential nutrients.
- **Stimulates root growth:** Encourages more profound and more extensive root systems.

Promotes healthy soil conditions and improves nutrient uptake

Mega-Fos Organic offers a sustainable and effective way to improve plant health, increase yields, and enhance soil fertility. It is a valuable tool for farmers and gardeners seeking to promote healthy and productive plants.

Recommended application:

Autumn: Apply one application of 2.5 litres per hectare.

Spring: Apply 1-2 applications of 2.5 litres per hectare.

MEGA-FOS ORGANIC

How Mega-Fos Organic works:

- **Megabacters:** These beneficial bacteria form a symbiotic relationship with plant roots, providing nutrients and promoting plant growth.
- **Humic and fulvic acids:** Improve soil structure and nutrient availability.
- **Seaweed extract:** Provides essential minerals and promotes plant growth.
