

COMPLEX FOLI-N

A Nutrient-Rich Solution

BETTER NITROGEN RETENTION

ENHANCED PLANT HEALTH

MORE EFFICIENT PHOTOSYNTHESIS

BETTER GRAIN QUALITY

ENVIRONMENTAL SUSTAINABILITY

MORE BIOLOGICAL ACTIVITY

Complex Foli-N is a specialised foliar fertiliser designed to meet plants' unique nutritional needs. It combines nitrogen, beneficial microbes, and organic compounds to enhance plant growth, productivity, and sustainability.

SFS
BIOLOGICAL SOIL
& PLANT HEALTH

Key benefits of Complex Foli-N:

- **Improved nitrogen uptake:** The stabilised amino nitrogen in Complex Foli-N is readily absorbed by plants, ensuring efficient nitrogen utilisation.
- **Enhanced plant health:** The beneficial microbial consortium in Complex Foli-N promotes healthy plant growth and development.
- **Increased photosynthetic efficiency:** Complex Foli-N helps to increase chlorophyll production and improve the efficiency of photosynthesis, leading to higher yields.
- **Improved grain quality:** Complex Foli-N can enhance grain quality by increasing protein content, plumpness, density, and uniformity, giving farmers a sense of accomplishment.
- **Environmental sustainability:** Complex Foli-N reduces nitrogen losses and minimises the environmental impact of fertiliser use.

promotes healthy soil conditions and improves nutrient uptake

How Complex Foli-N works:

Provides essential nutrients: Complex Foli-N supplies nitrogen crucial for plant growth and development.

Enhances microbial activity: Complex Foli-N promotes healthy soil conditions and improves nutrient uptake.

Improves photosynthetic efficiency: Complex Foli-N increases chlorophyll production, enabling plants to capture more sunlight and convert it into energy.

Enhances grain quality: Complex Foli-N can improve wheat grain quality by optimising nutrient uptake and distribution.

COMPLEX FOLI-N

Complex Foli-N is a valuable tool for growers seeking to improve crop yields, enhance quality, and promote sustainable farming practices.
